# Publisher Account & Dashboard

## Account Overview

This is an institutional account for publishing houses to sign up to Cowriehub's website with.

The publishers first create a user account just like any other individual and then upgrade their account into a publisher account by filling the sign-up form below.
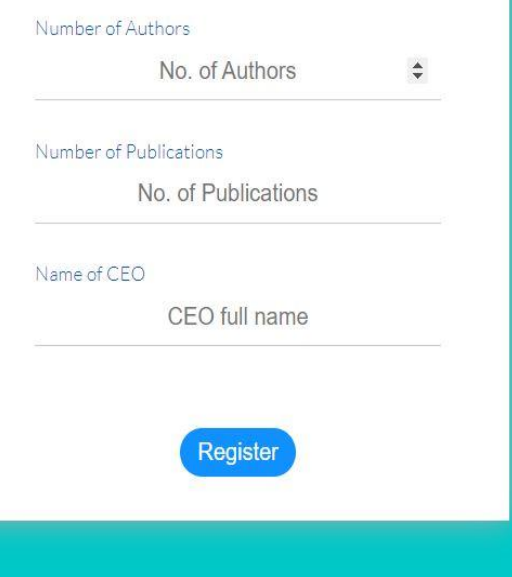

## Publisher Signup Form

**Signup Flow**

The account holder signs up with the details as shown in the image(<<on the left). A document of the publisher's business certificate is uploaded (mandatory). After the signup, Cowriehub verifies the authenticity of the publishing company and approves from the CMS. Approved publishers can now access their publisher dashboard to upload books and edit their profile details.

## Uploading Books as a Publisher

Publishers should be able to upload books by:

Number of Authors

No. of Authors

Number of Publications

No. of Publications

Name of CEO

CEO full name

**Register**

1.  **Creating author profiles and uploading book data under these author profiles**. E.g
    Author A is an author whose book is published by Publisher Y. Publisher after signing up,
    creates an author profile for Author A under the Publisher Y account. Books of Author A
    are now uploaded under the Author A profile. This should act similar to the author
    account, but under the publisher account. ADD AUTHOR button leads to creation of an
    author profile. An ADD BOOK button will be on the various author profiles in the publisher
    dashboard.
2.  **Direct upload approach**. Publisher accounts should be able to upload book data directly
    without creation of any further profiles. This can be done through the ADD BOOK button
    in the dashboard.
